

## Talk with your provider about your Migraine or Cluster Headache

An important step to understanding how to better manage your pain and associated symptoms is to have a conversation with your healthcare provider. Use this printable guide to help start the conversation with your healthcare team to see if gammaCore™ (non-invasive vagus nerve stimulator) is right for you.

### How many days do you experience migraine or cluster attacks?

- 1-9 headache days per month
- 10-14 headache days per month
- 15 or more headache days per month
- Multiple times a day
- Other\*

\*Specify: \_\_\_\_\_

\_\_\_\_\_

### How would you describe the level of pain of your headache attacks?

- Bothering
- Painful but tolerable
- Very painful
- Extremely painful

### Do you experience associated migraine symptoms like nausea, fogginess, and visual disturbance?

- Yes
- No

### How satisfied are you with your current treatment regime for migraine or cluster headache?

- Satisfied
- Somewhat Satisfied
- Not Satisfied

### Are your headaches getting in the way of your daily living and activities (social, work, school, family)?

- Yes
- No

### If you answered yes, describe the level of disruption you feel in your daily life.

- Not very disruptive. I can still go about my day.
- Disruptive, but I'll manage.
- Very disruptive. Getting through the day is challenging.
- Extremely disruptive. I can't function and I am often unable to work, go to school, commute, or spend time with others.

### Are you interested in a FDA-cleared device to treat headache pain and prevent migraine and cluster headache?

- Yes
- Maybe
- No

### Take a look at the answers to your questions.

Is your headache pain and associated symptoms impacting you more than you thought? Are you satisfied with the results of your current treatment? Are you interested in a non-drug treatment option?

**Bring this guide to discuss with your VA healthcare provider and ask if gammaCore may be right for you.**

gammaCore™ (non-invasive vagus nerve stimulator) is indicated for use in adult patients for adjunctive use for the preventive treatment of cluster headache, the acute treatment of pain associated with episodic cluster headache and migraine, and the prevention of migraine in adult patients. Available by prescription only. Please refer to the Important Safety Information on page 2.

# Choose gammaCore

gammaCore (nVNS) gently stimulates the vagus nerve to prevent migraine and cluster headache and relieve pain associated with migraine and episodic cluster headache.

- Demonstrated efficacy in multiple clinical trials with fast, reliable relief
- Can be used with other medications
- Avoids many drug-like side effects and does not involve injecting, inhaling, or ingesting medication
- Portable, convenient, hand-held electronic device

## How to get gammaCore through the VA

### 1. HCP Submits Order to Prosthetics

Product: gammaCore S300  
Item #10009-40601  
FSS: #36F79719D0063  
Quantity of units\_\_\_\_  
Product: gammaCore Sapphire 3  
Open Market Access (20% discount)  
Item #10009-40601  
Quantity of units\_\_\_\_

### 2. Prosthetics Sets up Vendor

Enter electroCore, Inc.  
as a vendor for your facility.  
For completion of new  
vendor forms submit to  
customerservice@electrocore.com

### 3. Prosthetics Faxes PO

Submit all POs to electroCore, Inc.  
by Fax **1-973-290-9171**  
or email to  
customerservice@electrocore.com

## REFILLS

gammaCore provides 31 or 93 days of therapy. To ensure your patients have uninterrupted access to therapy, please order the appropriate number of units.

## SUPPORT

Training is important to your treatment outcome. Call 1-888-903-CORE Ext. 2 to schedule a video or phone call for 1:1 training. Home delivery is now available.

For more information, visit [gammaCore.com/for-veterans/](http://gammaCore.com/for-veterans/) or text GCDEMO to 82605 to view a demonstration video.

## Indication and Important Safety Information

gammaCore™ (non-invasive vagus nerve stimulator) is intended to provide non-invasive vagus nerve stimulation (nVNS) on the side of the neck. gammaCore is indicated for:

- The preventive treatment of migraine headache in adult patients.
  - The acute treatment of pain associated with migraine headache in adult patients.
  - Adjunctive use for the preventive treatment of cluster headache in adult patients.
  - The acute treatment of pain associated with episodic cluster headache in adult patients.
- The effectiveness of gammaCore has not been established in the acute treatment of chronic cluster headache.
- Safety and efficacy of gammaCore have not been evaluated in the following patients:
- Patients diagnosed with narrowing of the arteries (carotid atherosclerosis)
  - Patients who have had surgery to cut the vagus nerve in the neck (cervical vagotomy)

- Pediatric patients
  - Pregnant women
  - Patients with clinically significant hypertension, hypotension, bradycardia, or tachycardia
- Patients should not use gammaCore if they:
- Have an active implantable medical device, such as a pacemaker, hearing aid implant, or any implanted electronic device
  - Have a metallic device such as a stent, bone plate or bone screw implanted at or near their neck.
  - Are using another device at the same time (e.g., TENS Unit, muscle stimulator) or any portable electronic device (e.g., mobile phone).

**NOTE: This list is not all inclusive. Please refer to the gammaCore Instructions for Use for all of the important warnings and precautions before using or prescribing this product available at [gammaCore.com](http://gammaCore.com).**

**By prescription only. US Federal Law restricts this device to sale by or on the order of a licensed healthcare provider.**
